

What is a fraction?

If you have the **whole** of something, you have all of it, for example, a **whole** apple.

A fraction is when the whole is **split** into **equal parts**.

1

Draw a line between each label and the correct picture.

A whole bunch of bananas

A whole purse of coins

A whole football

A whole lollipop

The whole world

A whole glass of juice

2

Look at the following. Add a tick (✓) if it is a fraction, a cross (✗) if it is not.

3

The jug is half full.
Colour it in to make it full.

FULL

Each side of this rabbit hutch can hold 5 rabbits. The left side is full. How many more rabbits will fill the hutch?

rabbits

Talk about 'one whole' with your child so they start to develop the concept of a whole. For example a whole bag of sweets or a whole bunch of balloons.
