

Super Scooper Maths Challenge

How many different ice creams can you make with two scoops? You have two different flavours to choose from. The first one is done for you.

chocolate

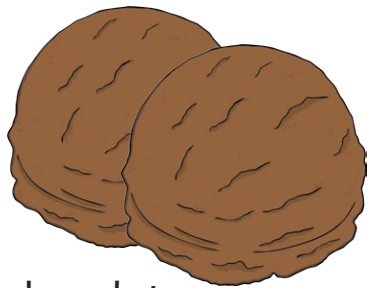

vanilla

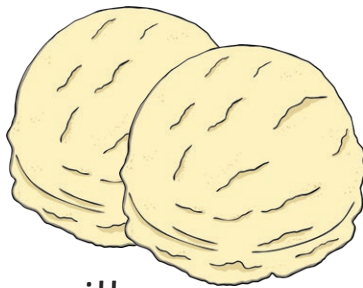

- Can you have the same flavour twice?
- How will you know that you have found all of the possible combinations?

Super Scooper Maths Challenge

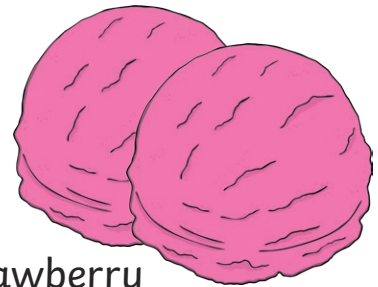

How many different ice creams can you make with three scoops? You have three different flavours to choose from. The first one is done for you.

chocolate

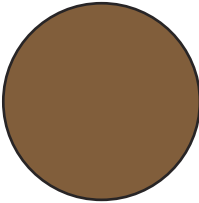

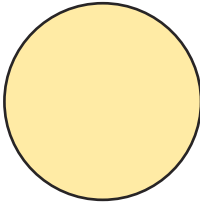

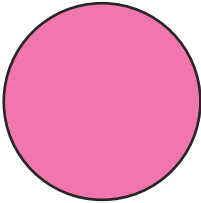

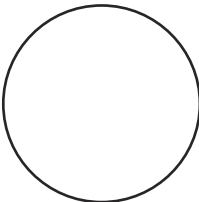

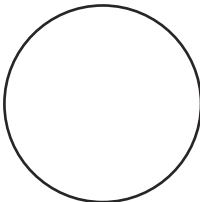

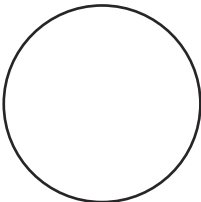

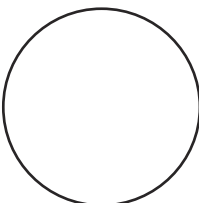

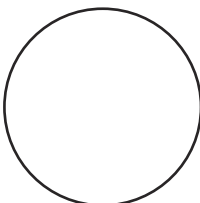

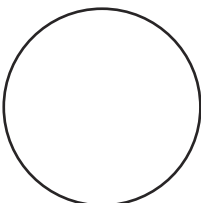

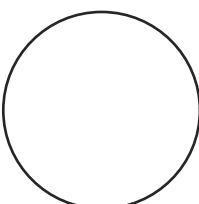

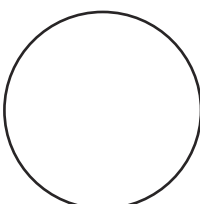

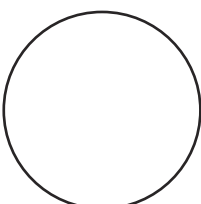

vanilla

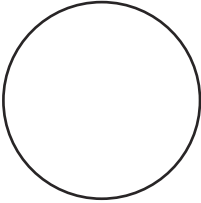

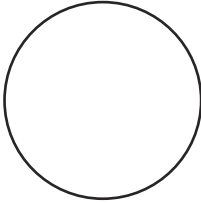

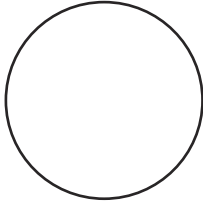

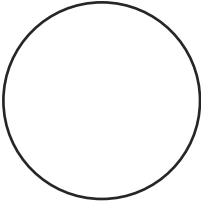

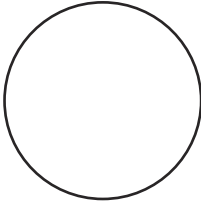

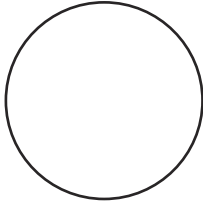

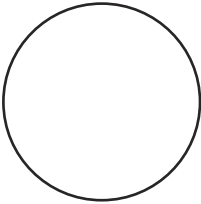

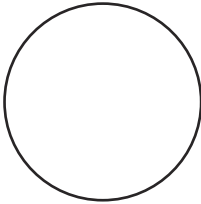

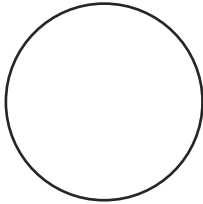

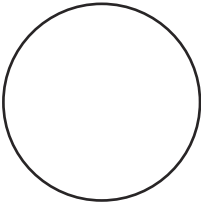

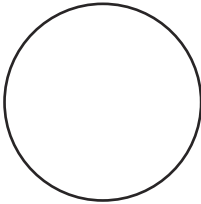

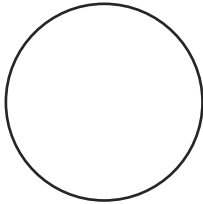

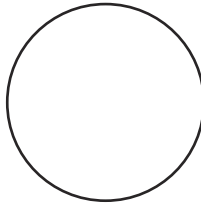

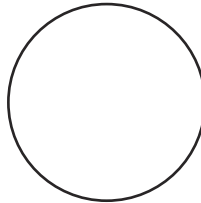

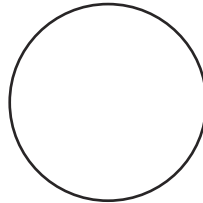

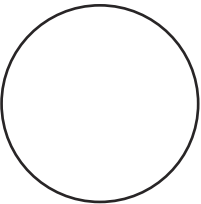

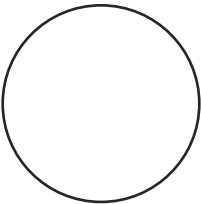

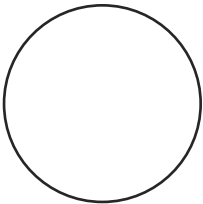

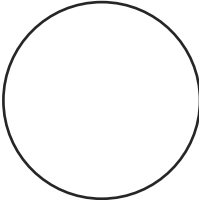

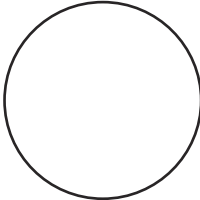

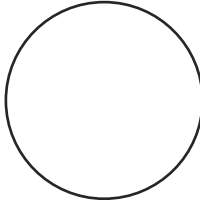

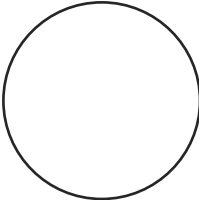

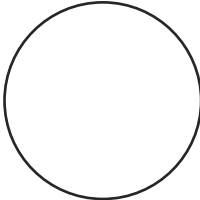

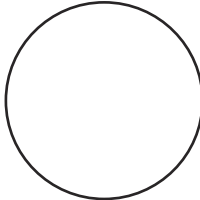

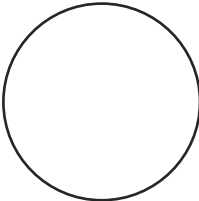

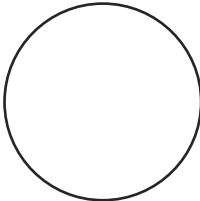

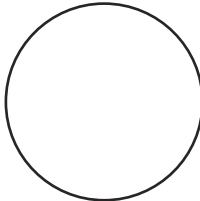

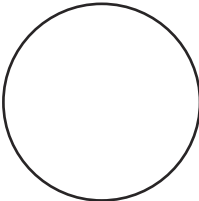

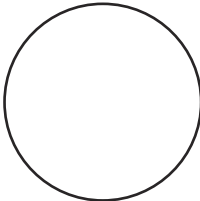

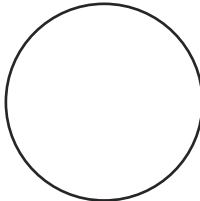

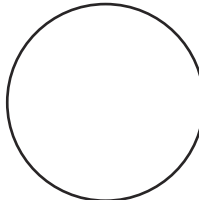

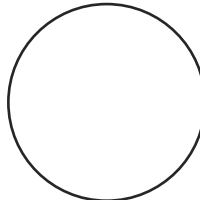

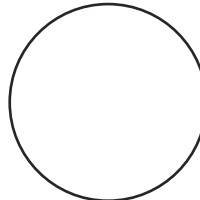

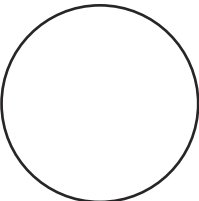

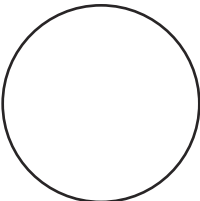

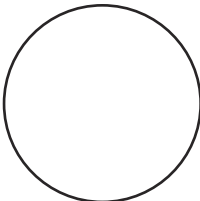

strawberry

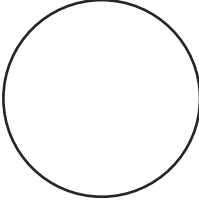

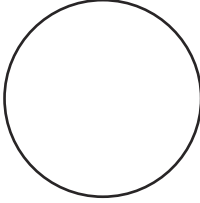

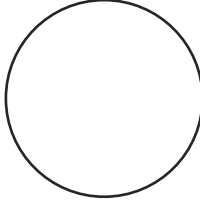

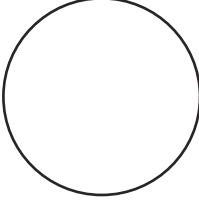

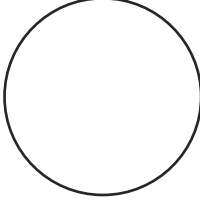

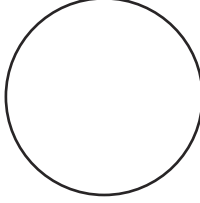

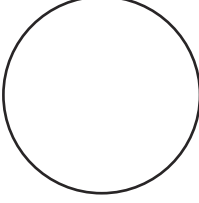

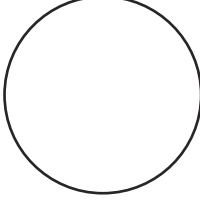

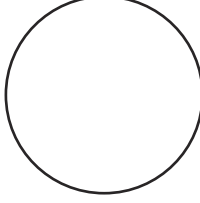

- Can you have the same flavour more than once?
- Can the scoops be the same flavours but in a different order?

How will you know that you have found all of the possible combinations?

	  
	  
	  
	  
	  
	  

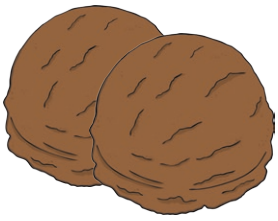

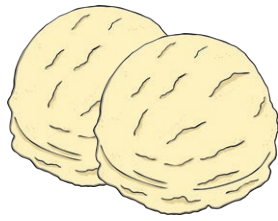

Super Scooper Maths Challenge

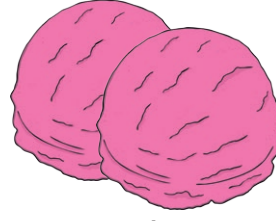

How many different ice creams can you make with four scoops? You have four different flavours to choose from. The first one is done for you.

chocolate

vanilla

strawberry

mint choc chip

- Can you have the same flavour more than once?
- Can the scoops be the same flavours but in a different order?

How will you know that you have found all of the possible combinations?
