

A prose snowball is a piece of poetry where each sentence contains one more word than the last. For example:

Cold.

Numb fingers.

My breath freezes.

Can't feel my toes.

I have sent for help.

If a prose snowball contains 13 sentences, how many words will it contain?

91 digits have been used to
number the pages of a book.
How many pages does the book
have?

An A5 booklet is made by using 8 sheets of A4 paper. The sheets are folded in half and stapled. The A5 pages are then numbered in order starting at 1.

How many pages are there in the booklet?

Think about the A4 sheet which has page 6 on it, what is the product of the other 3 page numbers on that sheet?

Read this extract from *The Twits* by Roald Dahl.

“A person who has good thoughts cannot ever be ugly. You can have a wonky nose and a crooked mouth and a double chin and stick-out teeth, but if you have good thoughts they will shine out of your face like sunbeams and you will always look lovely.”

- a) What fraction of the letters are vowels?
- b) What fraction of the words are adjectives?

This page comes from a book. The page numbers can be seen.

How many pages does the book have in total?
