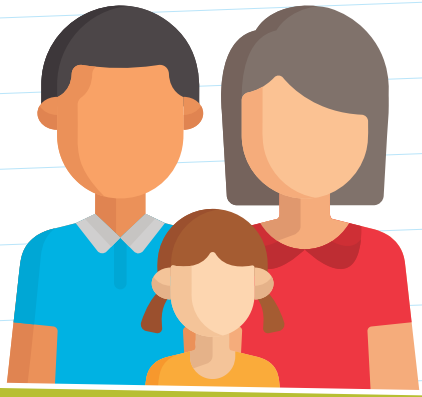
HOME CHALLENGE

HOME CHALLENGE

THE £20 FAMILY TIME CHALLENGE



ACTIVITY

This activity offers an opportunity to extend learning into the home by talking about budgets, savings and choices – all the things that your pupils have been learning about in the classroom.

Encourage pupils to go home and discuss with their families what they could do with £20. You could choose a lower amount if you think that would be more appropriate. Challenge them to come up with a 'family activity' that involves everyone in the household (maybe even their pets) and costs only £20 or less.

You could share the examples below to inspire them:

A home cinema night
rent a film, and buy popcorn and treats, then put cushions on the floor and close the curtains to make your own cinema.

Pizza restaurant
make your own dough bases and take orders for toppings, then cook the pizzas and serve them like they would at a restaurant.
You could even design your own menus!
